Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 8-28 are rejected under 35 U.S.C. 102(e) as being anticipated by Emmerich.

Emmerich discloses a cutting insert (20), which can be mounted in a tool holder that can be rotated about its longitudinal axis with an essentially conical tip (22), a transition region and a foot (40) for connecting with a tool body (10), wherein the transition region has several spatial areas (24), which are distributed over its periphery and adjoin one another forming spatial and cutting edges; wherein the spatial areas are curved concavely; wherein the spatial areas are inclined so that they enclose an acute angle with the longitudinal axis ; and wherein the spatial areas are rounded as they change over into the foot (40).

Response to Arguments

Applicant's arguments filed 11/16/06 have been fully considered but they are not persuasive.

There appears to be no arguments submitted by applicant but only notification that original claims 1-7 were cancelled previously and 8-28 were not treated. The examiner submits that this office action will corrects that problem and treats claims 8-28. Hence the examiner will not make this action final.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Willmon Fridle whose telephone number is 571 272 4476. The examiner can normally be reached on Monday - Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, MONICA CARTER can be reached on 571 272 4475. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
